

**EXECUTIVE OFFICER'S AGENDA REPORT  
DECEMBER 6, 2017**

TO: LAFCO Commissioners

FROM: Sara Lytle-Pinhey, Executive Officer *SLP*

**SUBJECT: 2018 WORK PROGRAM - MUNICIPAL SERVICE REVIEW & SPHERE OF INFLUENCE UPDATES**

---

**RECOMMENDATION**

Staff recommends that the Commission consider adoption of a work program to guide completion of Municipal Service Reviews (MSRs) and Sphere of Influence (SOI) updates for 2018. The Commission may direct Staff to prioritize certain updates as needed.

**DISCUSSION**

One of LAFCO's responsibilities includes a periodic review of spheres of influence for each city and special district. As part of this process a municipal service review must also be completed, outlining the services provided by the agency and making a series of determinations. Stanislaus LAFCO typically combines these into one document (referred to as a MSR-SOI) for better use of staff time and resources.

The requirement for reviewing and updating a sphere of influence is outlined in Government Code section 56425(g) which states, "on or before January 1, 2008, and every five years thereafter, the commission shall, as necessary, review and update each sphere of influence." Consistent with that section, Stanislaus LAFCO has generally made it a goal to initiate MSR-SOI updates for the special districts every five years, as these serve as a means for the Commission to check-in with various districts and service demands throughout the County.

For cities, the Commission has interpreted the "as necessary" provision in the above code section as coinciding with a city's General Plan update. City MSR-SOI updates are generally more detailed and time consuming than those of special districts and are often completed by a consultant in conjunction with an application to LAFCO.

The Commission's policies state that it is preferred that municipal service reviews be completed by LAFCO staff where possible to avoid additional costs of using outside consultants. The Commission's policies also state that in order to be cost-effective, MSR-SOI updates will be completed using existing information and documents that are available (e.g. master plans, general plans, budgets, etc) and are not intended to initiate new analyses.

Prior Year's Work Program

In 2017, LAFCO Staff completed MSR updates for the following districts:

- Modesto Irrigation District
- Turlock Irrigation District
- Empire Sanitary District
- Riverdale Park Tract Community Services District
- Eastside Water District (updated with a sphere of influence and annexation application)

An additional MSR is in progress for the Newman Drainage District. Staff has been in contact with the District and is awaiting additional information.

### 2018 Goals - Special Districts

Staff has identified the following special districts that would benefit from updates in 2018 to keep aligned with the five-year goal:

- Newman Drainage District (in progress)
- Salida Sanitary District
- Rock Creek Water District
- Turlock and Eastside Mosquito Abatement Districts
- Oakdale Irrigation District

A draft schedule for all the special districts, organized by the date of the last update is attached. The special districts are grouped together by the target year for adoption of a new MSR-SOI update.

### Upcoming City Updates

A list of each city and the adoption date of its current MSR-SOI document is also attached to this report. The cities of Hughson and Modesto would also benefit from updated MSRs. City MSR-SOI updates are typically initiated by the cities and/or their consultant in conjunction with a general plan update and/or a proposed sphere of influence amendment. For those cities currently undergoing general plan updates, Staff will coordinate with each to ensure the updated master plans are incorporated into MSR updates.

## **CONCLUSION**

Staff believes that the proposed work program can be reasonably completed throughout the year. Paid applications (e.g. annexations, out-of-boundary service extensions) have required processing timeframes that are given precedence over Municipal Service Reviews and Sphere of Influence updates and may delay individual updates. Likewise, tasks involved with upcoming projects (e.g. responses to environmental referrals, pre-application meetings, etc.) may also delay MSR-SOI goals. Staff will continue to keep the Commission apprised of the progress in meeting the goals of the 2018 Work Program throughout the year.
